Additional pictorial help

For steps 58-59

Expanders (for NON-partitioned inserts)

Now it's time to attach an Expander to our non-Partitioned modules.

*Remember— it's ALWAYS easiest to stitch them in place from the Expander side, with the Plank lying exterior side DOWN on the sewing deck.

(If you try to stitch it with the Expander side on the sewing deck, then you have to keep stopping and readjusting the loose fabric edges to keep from stitching over them. :)

So as we proceed to attach our 2nd Plank to the Expander, we once again stitch in place from the Expander side with the Plank lying exterior-side DOWN on the sewing deck.
