Elastic Pockets

Here's our Elastic Pocket placed on a Plank (#3). We've aligned the side edges and matched all the notches, and once again, there's some excess fabric along the bottom edge.

This time however, we're going to spread this excess out over 3 relatively equal sized tucks. Once done, pin them in place.

And here's how our finished Elastic Pocket looks. With 3 tucks on either side of the bottom notch, it's just amazing what this pocket can hold now. Baste the edges in place and move on!
