

## GateWay- Attaching Side Links - Step 11

11) Place Bag Front LSD on flat surface then place a Side Link “folded-side UP” along Wall edge attaching single notch to top corner of Wall & raw edges.

(Please note: the upper edge of Side Link actually extends  $\sim 1/2$ ” beyond top corner of Wall)

Using a zipperfoot, stitch in place a scant  $1/4$ ” from edges.

I included a couple of extra pictures here to give you a better idea of how this looks from both the interior AND the exterior.

**\*\*Also--** Please keep in mind that the final size of the Side Link you’re using in this pattern is actually a little less wide than the one pictured here. I made it smaller after these pictures were taken when I dropped the size of the gate ring to  $1\ 1/4$ ” instead of  $1\ 1/2$ ”.
