

the OutBreaker

Steps 11-12— Creating the Top Link

Step 11— As you can see in this picture, one of your two Top Links should be facing RSU and the other should be facing WSD.

Step 12— Place your Lock Link along the short edge only of the Top Link that's WSU. As you can see in this picture, I've pushed the lower part of this Top Link under the 1st Top Link to keep it out of my stitching path.

Step 12 (cont.)- Now I can stitch it in place close to the raw edges thru ALL layers

Step 12 (cont.)- And here's how the Top Links will look when we attach them to our Bag Back in step 25.
