

# the OutBreaker

Steps 35-37– Attaching the Bag Top & Bottom (page 1)

Step 35– These were probably the most difficult steps to draw out in the instructions and its so much easier to here in actual pictures. As you can see, the Bag Bottom is actually INSIDE the Bag Top with EST.

← Please note that each side seam of the Base is place in the CENTER of its respective Zip-Tab.

Step 35-37- Stitching in this way looks a little awkward doesn't it, and you know what? It IS a little askward, but its WAY easier than trying to stitch it together with the Bag Bottom face down on the machine bed.

As you can see, I followed this configuration while stitching the bias tape in place also .
