So here's my 2nd Zipper Pouch all nestled inside the expander of my 1st Zipper Pouch. As you can see, the Connectors are extended OUT to the Expander raw edges.

Here I've added the Bag Front and aligned the notches and edges with those of the Expander & Connectors. (also notice that my Closure is now flipped back and conveniently held by the magnets within the secret niche.) All raw edges should be facing OUT & AWAY from the Zipper Pouches.

Place the unit "Bag Front"-side DOWN on your machine and stitch in place a scant 1/4" from edges. This will feel clumsy and cumbersome but its not hard.

Here you can see that we've stitched the Bag Front in place and have almost completed this task.
