Steps 31a-38b: Creating 2nd Zipper Pouch

Important Note:

With the exception of adding the Side & Base Connectors (which are easy-schmeasy to insert), your 2nd Zipper Pouch is created exactly the same way as the 1st was made, with some very important differences....

Pay VERY close attention to the pattern pieces that are called for in each step!

(Please do NOT assume that you know which piece you'll be using next.)

For this reason we're going to skip ahead with the pdf's to step 38a +38b, which is basically identical to steps 27a + 27b. If your 2nd Zipper Pouch doesn't look like our 2nd zipper Pouch which is graphically represented in fig. 38a+38b and also pictured below, please stop and figure out why it doesn't.
