Folding up your Caddy's (#6)

11) Place Caddy RSD. Pull triple-notched edge DOWN onto interfaced side of Caddy until "A" notches align. Press flat. This is your "A" fold line.
12) Turn Caddy unit over so triple-notched edge is RSD now. Flip un-notched bottom edge UP & RST until "B" notches align. Press flat.

13a) Create your "B" fold line by pulling un-notched bottom edge DOWN onto interfaced side of unit until your "B" fold line is exactly 3/8" below your "A" fold line. Press flat.

13b) Before moving on to step 14. Here's a little peek under the "B" area for you to see the aligned "A" and "B" notches.

14) Flip un-notched bottom edge UP & RST until "C" notches align. Press flat.

15) Create your "C" fold line by pulling un-notched bottom edge DOWN onto interfaced side of unit until your "C" fold line is exactly 3/8" below your "B" fold line. Press flat.

3 3/16"
2 3/8"
17) Flip Caddys over, "slotted-side DOWN". Make a few <u>faint</u> marks on the <u>backside</u> of each Caddy to indicate the center, (3 13/16" from each side edge).

Draw a faint line thru marks then carefully stitch along this line ***from bottom to top edge*** w/slotted side of Caddys face DOWN on machine bed.

18) Make a few more <u>faint</u> marks on the <u>backside</u> of each Caddy, 2 3/8" from BOTH sides of the center line you made in step 17. Draw a faint line thru both sets of marks then carefully stitch along these lines as you did in step 17 then clip off all notches on both Caddys

18) Here's a look at our two finished Caddy's

Top right is the "slotted" front with credit cards in place

Bottom left is the "lined" back side. Do notice that I did NOT extend my lines all the way to the top of the Caddy (so they would not be seen later) but I DID extend my stitching to the top of the Caddy!

7/8"

7/8"

19) Retrieve Wallet from step 10. Place a Caddy WSD on Wallet lining so the "A" fold line is 7/8" BELOW top triple-notched Wallet edge aligning side edges together.

20) Likewise, place 2nd Caddy WSD on opposite side of Wallet lining so top "A" fold line is 7/8" BELOW un-notched Wallet edge. Secure placement with pins. *Please note: bottom Caddy edges should roughly "meet" at side, single-notched Wallet edges*. Baste in place close to both sets of side edges thru ALL layers.
