Creating Templates for Caddy(#6) & Caddy Interfacing (#14)

The full-sized pattern pieces for #6 & #14, (Caddy & Caddy Interfacing) are over-sized & can't be included in your package as is, therefore, the instructions to create them are below-

- 1a) Center the dashed line of #6a over the dashed line on #6b. Tape to secure, then place pattern piece on fold of fabric for cutting.
- 1b) Center the dashed line of #14a over the dashed line on #14b. Tape to secure, place pattern piece on fold of interfacing for cutting.
- 1c) Don't forget: Cut 2 each for BOTH fabric & interfacing use in step 15.

The two outside pictures are how your finished pattern pieces should look and the picture in the center is a closeup of the attachment area (centering over the dashed line).
