Step 34a- Placing & Securing Zip Panel- Part 1

Here's how your bag should look moving into step 34, with the zipper all pinned in place and ready to be sewn in.

You can see the lines that were drawn on the Wall lining in step 28.

34a) Align short Zip Panel end edges even along the straight line you marked on Wall lining in step 28. straight line you marked on Wall lining in step 28. Pin in place.

(Please note: the Wall unit is a bit wider than the Zip Panel. This is by design & its OK.)

Now stitch close to these edges to secure this area. DO NOT stitch across top edges of Wall or bottom edges of Zip Panel.
