

Festival Pocket Belt- Placing & Stitching Mag Snaps in Place - Steps B1+2 and C1+2

B1- Carefully cut out the area **WITHIN** mag snap circles of Lg & Sm Pocket (#2b & #4b. Place #2b & 4B in fleece on flat surface (w/fusible-side UP) then replace each pattern piece on it (aligning all outside edges). Mark along these edges within the cutout areas to transfer the snap placement to the fleece.

B2- Place one side of magnet set **Magnetic Side Up** within this outlined area on fusible-side of fleece. Secure placement with pins.

B2 (cont.)- Stitch in place close to plastic edge of magnet enclosure. Reinforce stitching. (for best stitching results, some machines yield better results using a ball-point needle).

Fuse fleece in place on Pockets in exterior (#2 & #4) sandwiching sew-in magnet in-between the layers.

Then....

Use these instructions to affix the matching sew-in magnet to both Flaps in fleece (#3b + #5b) and ultimately to both Flaps **in lining** (#3 & #5).
