

## Concealing Zippers under Wallet Floor- Steps 48, 50-51

48) Pull both zipperheads out as close as possible to side edge of Wallet (so that both zipper pulls are hanging BEYOND side edges). Place a pin below each zipperhead to secure this placement.

Then stitch across zipper teeth ~1/4" from the bottom of each zipperhead. Reinforce stitching. **(Caution: This stitching WILL be visible on outside of Bag.)**

Now trim zipperends ~1/2" away from this stitching.

## Concealing Zippers under Wallet Floor- Steps 48, 50-51 (page 2)

50) Center & align Floor WSD on top of zipper ends in center of Wallet. (The Floor should cover them completely.) Pin in place to secure placement.

51) Retrieve Coin Pocket from step 22. Remove just enough pins along Floor edge closest to CC Slots to slide the bottom 1/2" of your Coin Pocket underneath it.

Repin Floor area in place thru Coin Pocket (to conceal raw edges), then top stitch around entire Floor perimeter thru ALL layers.

**(Caution: This stitching WILL ALSO be visible on outside of Wallet.)**
