

Wrapsody step 35-37– Stitching Walls in place

Step 35– In this photo, we have both of our Walls pinned in place (LST) and they are ready to be stitched.

Step 36– Now we've got our Center Pocket standing up straight and we've wrapped our Wall around those zig-zagged Pocket side edges.

I especially wanted to show you the way I have the Wall pinned to the pocket, because due to the multiple layers involved here, I recommend placing your pins horizontally on BOTH sides of the Wall. This way you won't feel like these pins need to go all they way thru ALL the layers. (see photo below)

Step 36 cont.– Here's a better view of the pinning.

Wrapsody step 35-37 (cont.)– Stitching Walls in place

Stitch down from bias tape edge, and be sure to remove the pins as you come to them. They probably won't be inclined to "give way" if you choose to stitch over them and you could sacrifice a few needles if you try...

Your bottom pin should be placed ~2.5" below the bottom edge of your bias tape. Stop stitching when you reach that pin, but **do** reinforce stitching on both ends. In the photo at right is our Center Pocket stitched into place on both sides, now it's on to the Front Pocket.

We pinned our Front Pocket into place in the same way, placing our pins on both sides of our Pocket. The picture above is an overhead shot.

Wrapsody step 35-37 (cont.)– Stitching Walls in place

And finally here's our Back Pocket pinned into place. And just so you know... it perfectly OK to squash this bag and the Pockets out of the way in order to accomplish this stitching. The Soft & Stable is remarkably forgiving and don't worry, this bag will pop right back to its correct shape afterwards! :)

And here's our Wrapsody with ALL the pockets stitched into shape. We're almost finished now.

Now we can snap our Flap closed and get a really good idea of how wonderful our completed bag is going to look! So let's finish it!

:)
