

## Wrapsody step 7-10– Applying bias tape to curvy Wall edge

**Clockwise beginning  
with photo at left**

**1st**– with ruler placed alongside upper & lower Wall notches, draw a line on the lining side of Wall. I use chalk but whatever you use, it's NOT going to show when your bag is finished.

**2nd**– s-t-r-e-t-c-h your bias tape as you pin it in place to get a smooth ripple-free finish (see my video referenced in the instructions and as you can see, I use LOTS of pins and this also HELPS!)

**3rd**– with that done we can flip the bias tape over the raw edges and stitch them into place. :)
