

Baggalista- Step 23-24. Curve Pocket

So here's our Curved Pocket on the Body in lining and it's concealing the invisible sew-in snaps. But the thing is, anything we put into this pocket MIGHT come between the magnets and that would keep the Flap from clamping shut, as we want it to, so.

Stitch a short line about 1/2" ABOVE the snap (you can feel it with your finger). This will keep your pocket contents from getting between your magnets and causing this problem. :)
