

# The Cosmo Convertible

## Step 27

### “Attaching the Lining”

27) I've got the lining in place here, pulled over the top of the Bag so that the lining is RST with the exterior. The corner closest to you is the one that has the tail ends of the zippers.

27 cont.) Now the opposite corner is closest to you and as you can see, this is the corner that has the top edges of the zipper. Now you're ready to stitch it in place a scant 3/8" from the edges. Restitch for security!

27 cont.) Here the lining is stitched in place and you can clearly see **BOTH** sets stitching lines. The black stitching is from the zipper installation, and I used blue thread to stitch the lining in place a scant 3/8" from the edges.  
**Remember! To only clip up to the 1/4" seam line.**

27 cont.) Here's the finished Bag top look, all pressed and topstitched. :)
