

The Cosmo Convertible

Steps 18-19

“Aligning Side Notches”

18) It can be a little tricky aligning the side notches of your Bag Front & Back so I've included several closeup shots.

Here you can see that with the fleeced side down, I've folded the bottom Bag edge UP until the bottom (A) notch aligns with the middle (B) notch.

It's pinned in place.

18 cont.) Here's a closeup of the alignment.

19) Flip the unit over so it's fabric side down.

Now, while keeping the “A+B” notches aligned together, fold them UP so that they BOTH align with the “C” notch.

19 cont.) With everything carefully pinned in place, you'll want to stitch this all in place in TWO spots.

First stitch 1/4" away from side edges, then stitch 1/2" from side edges.

19 cont.) Here's another view of the same stitching.

Now do the same thing in on the other side of Bag Back and on BOTH side edges of your Bag Front.

19 cont.) Here's how it should look from the right side of the Bag Back.

This stitching is very important to the proper exterior look and functioning of the Bag.
