

"Stacking" & Pressing your Dividers

Step 64 from "the Attache Bag"

Step 64- I can't stress enough how important it is to correctly press your Divider unit. Do it now! DO NOT wait until you've placed it into your Bag.

And if you'd normally use a steam iron, now would be a good time to put some water in your iron and do so. A pressing block is extremely useful for "setting" your pressing area. (They're not expensive and I find them an absolute must when sewing up small projects like bags!)

In this photo at right you can see what a GREAT job our steamy iron and pressing block did.

LOOK at those beautiful flat folds! :)

Now BOTH sides are pressed and our Divider unit is ready to be placed and sewn in our bag!

We're almost done!

:)
