

Placing & Stitching Divider in Bag

Step 65 from "the Attache Bag"

Step 65- Open Bag WIDE & place Divider unit inside w/Coin Pocket and ALL embellished Divider sides facing you. I like to see my credit card right in front of my cash slot and coin purse, but you may feel differently and that's fine if you do, but now is the time to decide.

Either way, the goal is to snug the top corner of the Divider just under the zipper teeth of the coin purse (or the Mesh Pocket on the other side of the bag)

In this photo you can see that we pinned our outside Welt edge parallel to and 3/8" away from the Zip Panel side seam.

This the way all four Welt side edges should be placed and they all need to be handstitched in place.

Sorry, I'm not crazy about handstitching either but in this particular case, I think the end result was really worth it! :)

Enjoy your new bag!
