

Festival Pocket Belt- Attaching Contrast Band on Pocket Flaps - Steps 16

Topstitch across top straight Flap edges then beginning at top of Flap, stitch as close as possible to Band edges using a zipperfoot, then stitch across Band close to enclosed D-ring (over step 14 stitching). Set both Flaps aside for step 19.

****DO stitch close to Flap Band edges to avoid hitting the magnet enclosed within fabric layers, causing your needle to break. *DO stitch close to Flap Band edges to avoid hitting the magnet enclosed within fabric layers, causing your needle to break.***

In this picture you can see where the Contrast band is tucked into the top seam of the Flap.

Here's a good shot of the stitching along the side edge of the Contrast Band. As you can see, I did not quite stitch ALL the way to the junction of the D-ring and that's OK. It IS important however to reinforce the stitching at whatever point you stop.

And finally, here's a picture of how the stitching looks on the lining side of the Flap.
