

# The Flaptastic Bag

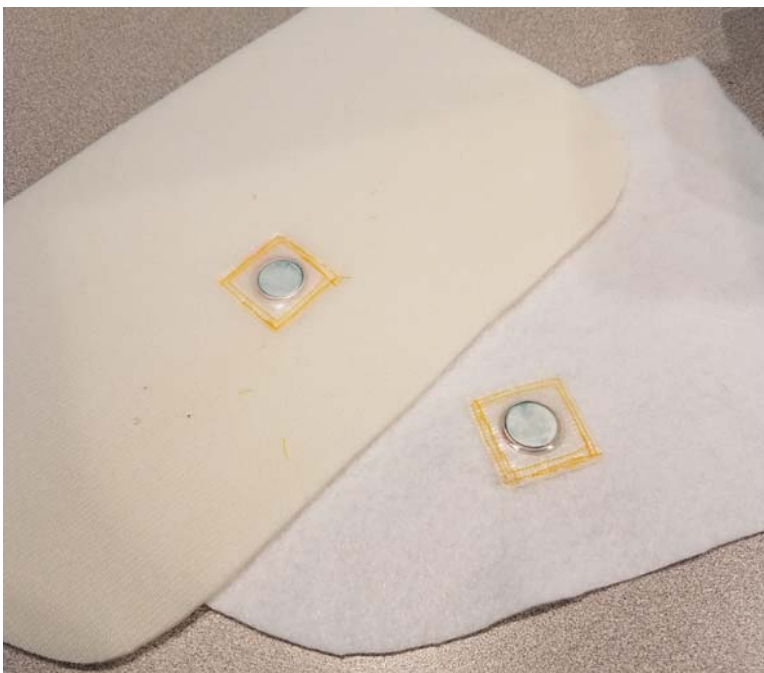

Placing & Stitching Mag Snap in place

Steps A1 + C1

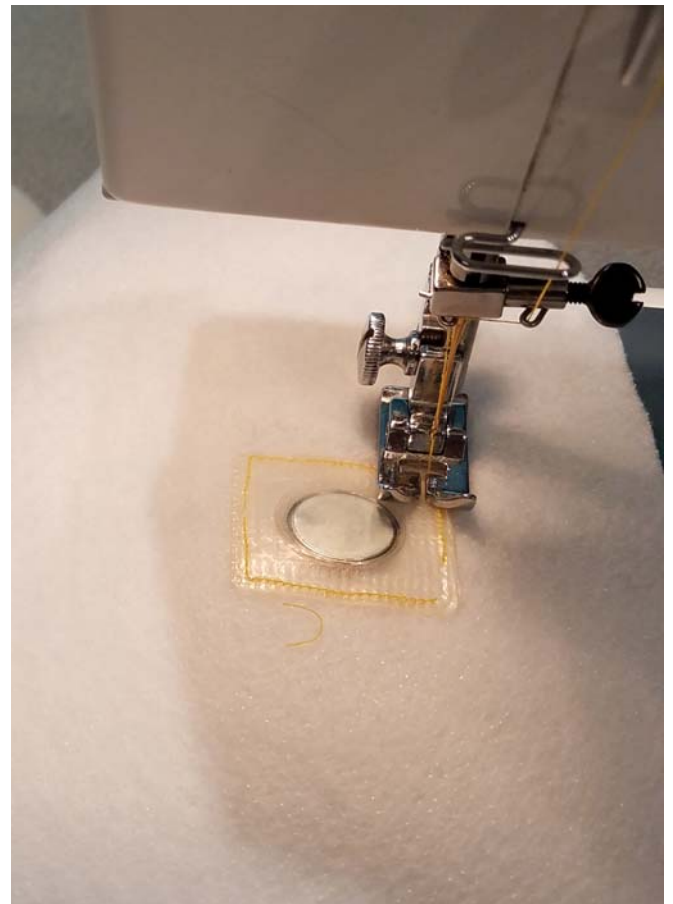

**First-** Carefully cut out the area WITHIN mag snap circles of Pocket (#6) and Pocket Flap (#8). Place Pocket in Soft & Stable and Pocket Flap in fleece on flat surface (with fusible-side UP) on flat surface then replace each pattern piece aligning all outside edges. Mark along the edges within the cutout areas to transfer the snap placement to the foam product and to the fleece.

**Next-** Stitch in place close to the plastic of the magnet closure. Reinforce stitching. (For best stitching results, *some* machines yield better results using a ball-point needle.)

**Next,** Place one side of your magnet set "Magnetic side UP within the outlined area on foam product/ fleece. Secure this placement with pins.

**And lastly-** Either fuse fleece to WS of Pocket Flap (#8), OR--- place Pocket in Blender (#6) WSD on magnet-side of Pocket foam, then stitch in place close to all outside edges.
