

Go-Go Compact- Bag Exterior- Steps 35a+c

35a) Retrieve Bag Lining from step 21. Place it foam-side DOWN on flat surface. Push zipper pull closure as far as possible **into** open end of Floor. Leave the fabric pull tie hanging out of opening, but secure the ends out of the way w/pins.

35b) Flip Bag Lining face DOWN on flat surface & place Bag Exterior WSD on foam side locating Slip Pocket OVER Wallet area of lining. Align outside edges & notches & pin in place. **IMPORTANT!** Pin the "poofy" areas of Slip Pocket away & out of your sewing path.

See the closeup at right!

35c) I cannot stress strongly enough how important it is to **flip unit over (ESD) on machine bed** before carefully stitching in place close to edges. Don't forget to use a zipperfoot, that helps too!
