

# Go-Go Compact- Reinforcing Strap Holder Attachments- Steps 38-39

38) Pin Strap Holders & Tab to Bag Exterior to secure in place

Remove horizontal (*step 18*) zipper pins temporarily from both zipper corners at Bag Floor openings (on CC Slot side of lining ONLY). Now bend zipper tapes **away from lining** toward raw edges of Bag & pin in place, out of sewing area coming up in step 38. (*see arrows at right*).

39) Now **flip Bag over LSD** and “stitch in the ditch” of Front Lining seam from “outside Strap Holder edge-to-outside Strap Holder edge” to add strength to those attachments

Start & stop stitching at “outside edge” of each Strap Holder (See blue arrows at left)
