“Attaching Your Bag Front” - Steps 51

Step 51) Place Bag lining-side DOWN on table. Now place Bag Back unit exterior-sides together with Bag Front aligning all outside notches, edges and top corners. (Bag will be inside out.) Stitch in place a full 1/4" from all three outside edges. Restitch entire seam for security. DO NOT turn bag RSO yet. Press seams for all four top corners IN toward Rim. (Both of these picture depict the very same thing but at different angles. I just thought it might be helpful.)
