

The Guardian

“The Guardian Front” – Steps 23-27

Step 23) Now retrieve your remaining Caddy (with the straight top edge) and place it wrong-side DOWN on right side of your Bag Lining, sandwiching the magnetic snap (from step 22) in between the layers.

The side notched edges of your Caddy should be 2 5/8" from each Bag lining side edge.

Baste Caddy side edges in place.

Step 24) You'll need your two 8" X 2" lining strips for this procedure.

Place step right-sides together along each Caddy side edge aligning raw edges, then stitch 1/4" from edges.

Press lining strips away from Caddy, flat against bag Lining. Now baste long lining edges in place to secure them.

Page 2

Step 26) Place a Rim right-sides together on top edge of Bag Lining. Stitch in place 1/4" from edges. Press Rim and ALL edges UP and away from Bag Lining.

Now center this unit on a 10" X 12" piece of Soft & Stable. Baste around all four Bag Lining edges, then cut away excess Soft & Stable even with Bag Lining edges.

Step 27) Now retrieve your CC Holder unit and place it lining-sides together with Bag Lining, aligning your 3 outside edges.

Your magnetic snaps SHOULD engage now, if they don't, NOW is the time to investigate.

Baste in place around your 3 outside edges and set aside.

This is your Bag Front. :)
