

## **Quattro– Step 55.pdf**

Step 55a– Push your zipper end as far into your completed Zipper Tab as possible. Remember– the Zipper tab is optional for a 16” separating zipper (as shown here), but it is MANDATORY if your zipper end has to cut and shortened.

Step 55b– We recommend stitching across the folded opening edges of the Zipper Tab (see step 56a, for the exception of plastic zipper teeth), and also alongside the enclosed zipper teeth, to secure it. (stitching lines are indicated by arrows)
