

Attaching zipper to tip end of Base - Step 37

Here you can see that I've pinned the narrow edge of a Base tip to free zipper edge. I've placed a vertical pin at the step 35D stitchline. Stitch in place a scant 1/4" from edges beginning at the Step 35D stitch line & stopping just beyond top corner end of Base.

← (the stitchline is indicated with the red line, at left).

When done correctly, this will cause the tip area of Base to "pooch up" a little, but that's OK. →
