

Attaching 2nd zipper edge (part 1) - Step 38 a+b

Please note that in the bottom edges of the Pouch Linings are not stitched together which is contrary to the instruction in step 32, but these pictures were taken prior to me realizing that it was just easier to stitch these bottom edges together PRIOR to steps 38 a-c. Please don't let this be a distraction to you. :)

OK- so here's our Bag Front all laid out on a flat surface with the Inside out (with Pouch Lining pulled out of bag (also inside out))

Now we get our Bag Back and place it on the table with right side out. Now pull this pouch Lining out so that it is ALSO right side out.

Next- push your Bag Back IN-SIDE your Bag Front by first pushing the Bag Back Pouch Lining INSIDE the Bag Front Pouch Lining

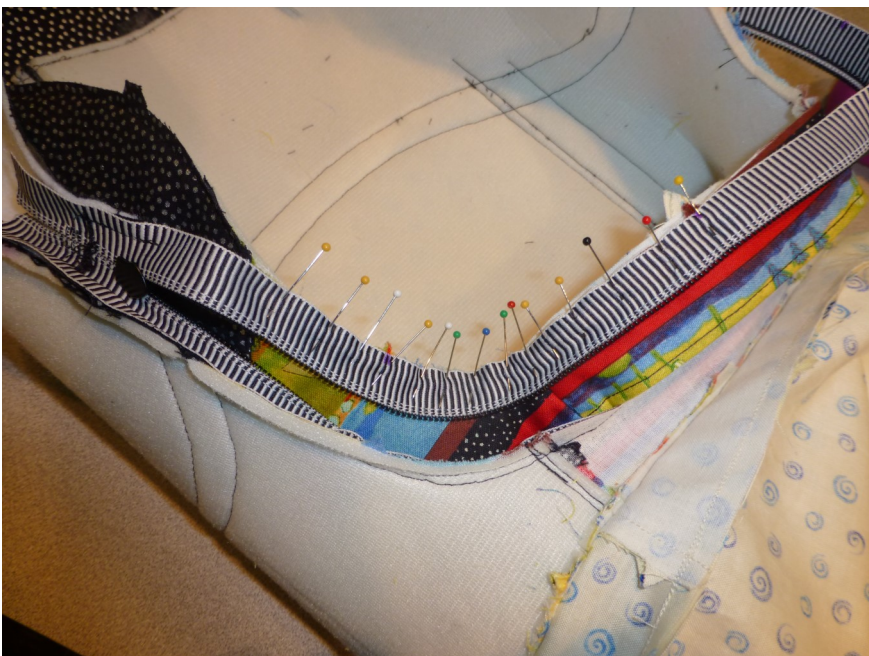

Attaching 2nd zipper edge (part 1) - Step 38 a+b

Keep pushing the Bag Back into the Bag Front until the Bag Back Rim area is near the free edge of your zipper.

Pin your free zipper edge **RST with Rim** on Bag Back aligning single notch to the zipper mark you made in step 35B.

Now open the zipper completely and continue aligning free zipper edge with Rim & both Corner areas of Bag Back, stopping ~2" above double notch on tip of Base. On both sides.

(Please note that the photo at left only shows one side of the zipper pinned in place to just above the Base, but you WILL want to pin the zipper in place on BOTH sides of the center single notch)

Stitch 1/4" from edges in this pinned area ONLY, leaving Base area open until step 38c.
