

Magnet Placement- Prelim step B3

Carefully cut out the area WITHIN both mag snap circles on your Bag(#6) pattern piece (from step A).

Now Place a Bag in foam on flat surface and replace your #6 pattern piece on it (aligning all outside edges). Mark along the inside edges (within the cutout areas) for both magnets to transfer your snap placements to the foam. I do it with a sharpie.

Repeat procedure w/2nd Bag(#6) in foam.

Now all you have to do is place the magnet in place (magnetic side UP) and stitch it in place!

:)
