# Steps A1 + A2- Preparing CC Slot Templates

The full-sized pattern pieces for both #3 (CC Slots), and #18 (CC Slots Interfacing) were too big to include in your package in their actual form. The instructions and pictures below will help you create the correct sized pieces.

A1- Center dashed/dotted line of #3a over dashed/dotted line on #3b. Tape to secure, then place pattern piece on fold of fabric (as indicated) for cutting.

A2- Center solid line of #18a over the solid line on #18b. Tape to secure, then place pattern piece on fold of interfacing (as indicated) for cutting.
