

GateWay- Making & Attaching Expander- Step 13- 14

13) Press Expander in half lengthwise (contrast sides together), aligning top finished edges. Stitch $\sim 1/8$ " from folded-over edge beginning at top corner, to a spot roughly even w/ side double notch (see red arrows). Repeat this procedure on opposite Expander end.

14) Retrieve Bag Front from step 11. With zipperheads located at top of Zip Pouch, place Expander "contrast-sides together" with Wall & free edge of zipper, aligning all notches & sandwiching Side Links & Wall in between layers. Using a zipperfoot, stitch a scant $1/4$ " from raw edges through ALL layers.

I've included an interior and an exterior picture for you here just in case you need help visualizing this. :)

And here's yet another shot after the Expander is sewn in place.

This is how it should look, Now you're ready to move on!
