

## GateWay- Attaching Clip Links Step 31

31a) Press over ~1/4" on BOTH Clip Link ends.

Now press Clip link UP & OVER bias taped top edge of Bag Back to Niche side so the pressed-under raw Clip Link edge butts up to the finished bias tape edge. Pin in place tucking any visible raw edges within Clip Link folds.

31b) Prior to stitching, It's very important to make sure your Clip Links won't be restricting the free movement of your Gate Rings. Get a Gate Ring and pass it thru your Clip Links to test this. It shouldn't be loose, but it should move thru the Clip Link unimpeded. If it's too tight, you can always let out a little of that 1/4" hem to accommodate your Gate Ring. Once you're satisfied, stitch in place TWICE\*\*. Reinforce stitchings.

\*\*Please note in the picture at left, this stitching WILL be visible on the back side of your GateWay. DO choose your thread color carefull to minimize the impact.
