Step 8: Adding Bias Tap to Your Flap? Yes or No

Its totally your choice as to whether you add bias tape the Flap of your Pocket or not, but it can make a big difference in how your bag exterior looks.

In the two pictures above, I think I could've easily gotten away with out the bias tape because there was enough color & print definition between the Flap and the Pocket that it would've been OK, but in the example to the left, I think this exterior would've REALLY benefited from not only bias-taping the Flap, but also by using a 2nd contrasting fabric for either the Flap or the Flap Band. I wish I had done this anyway! :)
