43– Place two pins along top edge of Back Pouch exterior, 3/4" away from BOTH sets of side seams.

44– Open zipper completely & place a top zipper stop RST & even w/the pin on the RIGHT side of Back Pouch exterior.

45– Continue pinning zipper even w/Pouch edges stopping at the pin at opposite seam.

Please take special note of the RS and WS relationship of this zippertape as you apply it to the opposite side of this Pouch. **BOTH** sides of your zipper need to be RST with your Pouch as this one is.

Here's how it all should look when its all pinned in place correctly.

47– Start your stitching (*1/4" from raw edges*) at the bottom end of the zipper beginning at one of the 3/4" marker pins. Continue stitching around bag including **OVER** the top zipper ends.

Stop stitching at the 3/4" marker pin on the opposite side of the zipper bottom area.

Here's a closer look at the zipper top area.

Please remember, you stitch **OVER** the zipper ends the top of the zipper, but **NOT** at the zipper bottom area. That area is left open for now.
