

Steps B1-B7 – Placing Your Magnet Pairs

B1: As you can see above, I've labeled my magnet pairs. One set is labeled with one faint dot, the other with two faint dots (emphasis on faint... since you do not want to see these dots later on thru your fabric).

B3-B4: (at right) I've transferred the placement circles from my template to the foam, then laid my magnets out so they will match/meet when the foam is closed.

B6-B7: In the pictures above you can see where I've pinned my magnets in place and then sewed them to the foam. (Do take care to reinforce your stitching but **ONLY** in the reinforced plastic area surrounding the magnet edge.) And finally you can see where I've labeled the top edge of the foam destined to be on the Bag Front.
