Steps 55-56– Stitching Bag Lining in place

Step 55– Here's two pictures of the Bag Lining placed **INSIDE** the Bag Exterior.

As you can see in the photo at right, the bottom edges of the Bag Lining are open & unstitched.

Now stitch 1/4" from edges around entire circumference of bag opening. Restitch for security.

Step 56a– Pull Bag Lining out of Bag

(so that both the Bag Exterior & the Lining are WSO).

Step 56b– Now carefully push **ENTIRE** Bag Exterior thru the unstitched bottom area of Bag Lining so that everything is **RSO** now.

*Please note that now is the ideal time to press all of your Bag Exterior seams **OUT**.*

Steps 55-56– Stitching Bag Lining in place (cont.)

Step 56c– Press the open, unstitched edges of Bag Bottom area over ~1/4" (WST).

Align these pressed edges together, pin to secure, then machine-stitch them closed.
