

# the Double Take

StudioKat Designs, Inc.

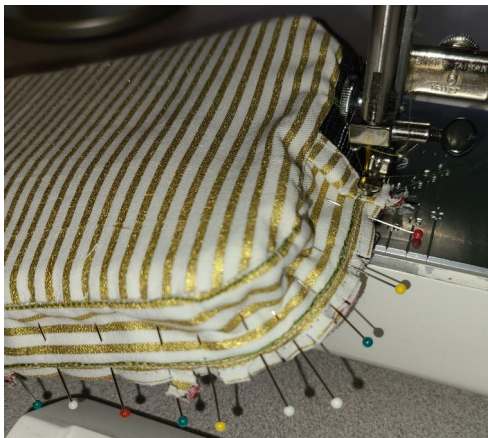

**Steps 27a-27b:**  
Attaching 1st Magnetized Niche

Phone: 866/409-8634

Push zipper and Wall back OUT at all 4 corners so Zip Pouch is totally LSO now.  
(Don't forget to clip into the edges of the Wall/Expander area at both bottom corners.)  
Retrieve a "Magnetized Niche" & begin aligning it RST with zipper & Wall/Expander.

This procedure is best accomplished in 2-3 steps. I generally leave this area around the open zipper pull (mainly because the zipper & pull tend to interfere with the stitching

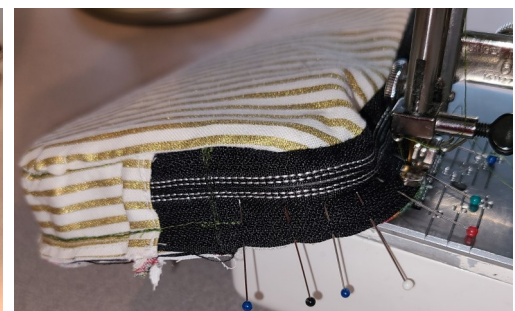

I find it easiest to start stitching a FULL 1/4" from edges at the top of the Wall/Expander (*just under the area I left open & unpinned above*).

**BUT**— I recommend dropping down & stitching a SCANT 1/4" from the edges thru the zipper/Pouch top area.

**WHY?** Because this area will be restitched in the upcoming steps and by doing this you can be sure this stitching will eventually be covered and unseen. :)

Now you can go back and pin the area you left open in place along the zipper edge and then finish stitching the zipper in place.
