34) Prior to flipping Facing over Bag Top edges, reach under Facing at zipper bottom & pin loose zipper edges safely away from seam area of Facing. Now carefully stitch 1/4" from Bag Top edges for ~3/4" BETWEEN the two zipper edges. DO NOT stitch into zipper edges.

*(Please Note: The areas directly under the two zipper edges MUST remain open & unstitched.)*

**Here's some random pictures of the Bag Top area all pinned and ready for top-stitching.**

35) Press Facing INTO Bag. (*Please note: Facing should conceal the top un-bias-taped area of Bag Lining side seams now.*)

Pin in place to secure placement & carefully topstitch close to entire finished Bag top edge.

*(You may need to stop a few times to move your free zipper bottom edges UP, completely out of stitching area.)*
