the AeroSling

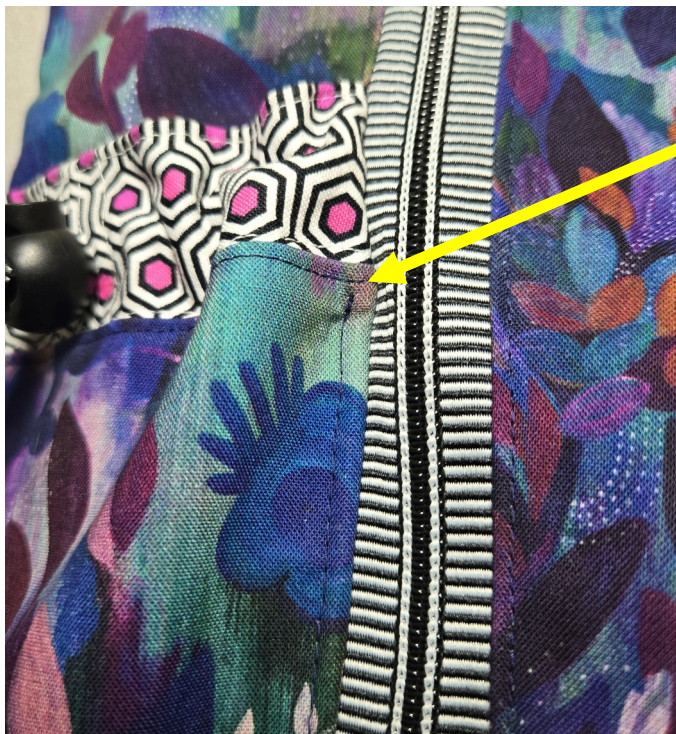

Step 18: Topstitching close to Front A zipper seam.

18a) Beginning at top edge of Front A, begin topstitching close to seam edge, **BUT- Do NOT topstitch over top edge of Cord Tunnel**. Instead, topstitch slowly & carefully DOWN & INTO Pouch for ~1/4", but stop right there.

Here's how this stitching area looks from a different angle.

I thought it might be helpful to see.

18b) Resume topstitching close to seam edge just **BELOW** the Cord Tunnel. (*In my opinion, this produces a better "look".*)
