Steps 25-28: Creating the Zip Panels for the Strap

25) Open zipper partially & place the pressed zipper end RSU on RS of Zip Panel, aligning zipper edge with unfolded edge of Zip Panel AND & placing top zipperstop ~1/4" below folded-under Zip Panel end. Pin in place then stitch 1/4" from this edge **ONLY**. Press Zip Panel away from zipper.

** I included 2 pictures here so you could see that the zipper is placed on the UNFOLDED side edge of the Zip Panel and the FOLDED end edge of the Zip Panel*

26) Press folded edge of Zip Panel UP & onto RS of zipper so that it just covers the step 25 stitching AND, so the end corners align exactly. Pin in place. Stitch close to **this folded edge ONLY**.

** I have again included 2 pictures here (one close up and one full-length for clarity). FOLDED end edge of the Zip Panel*

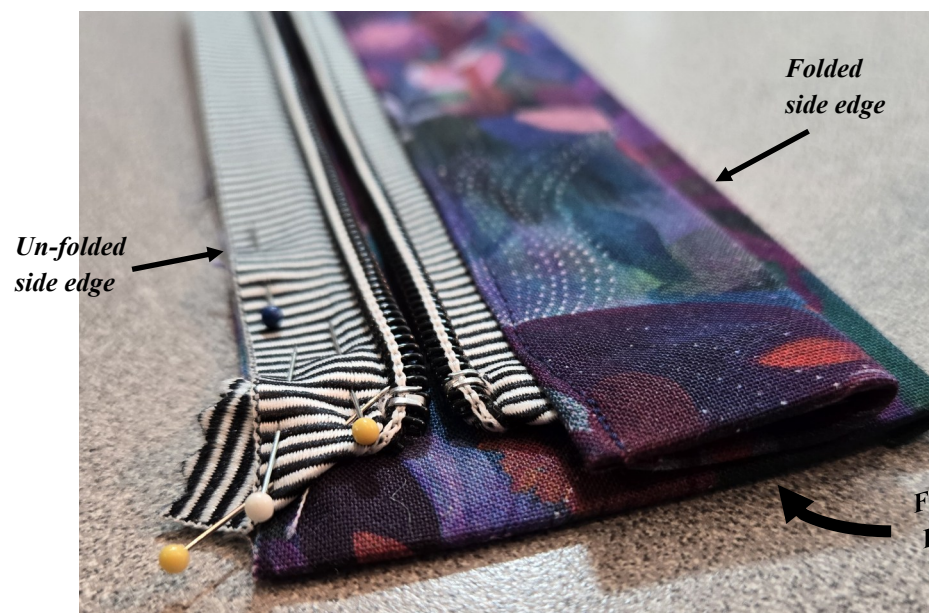

DO NOT
stitch over
Zip Panel
ends!

Steps 25-28: Creating the Zip Panels for the Strap (cont.)

And here you can see that side 1 of your Zip Panel is stitched and complete, except for the the Zip Panel ends which remain unstitched.

27a) Now align remaining long edge of zipper RSU on RS of the unfolded side edge of your 2nd Zip Panel, so the top zipperstop is ~1/4" below the folded-under end. Pin in place.

27b + 28) Here we see the 2nd Panel stitched in place, (above) then pressed over & UP onto zipper edge (below) concealing the step 27 stitching.

Steps 25-28: Creating the Zip Panels for the Strap (cont.)

Here's 2 shots of the completed Zip Panel.

Please notice that the Zip Panel ends remain open & unstitched.
