the Cargo Strap
Steps 23a– Adding the zipper to the Mini Pouch

The instructions for this zipper are almost the same as those of the Mega Pouch. There are a couple differences and I'll point those out.

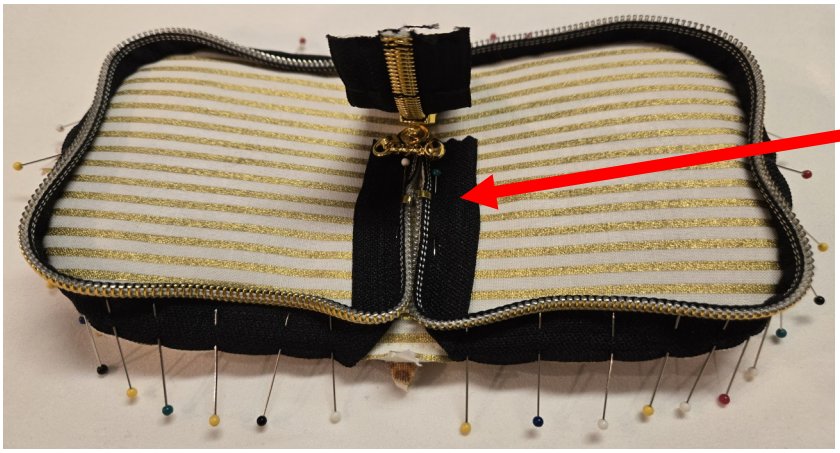

22) Draw a faint pencil line directly onto lining fabric, to ***almost*** connect the side single notches. (*Don't worry, this won't be visible later on.*) **DO notice** that I didn't extend this line all the way out to the fabric edges.

Open zipper completely. But be careful with that cut zipper edge from step 21.

23a) Place zipper edges WSD on Mini Pouch lining aligning a marked edge with the single notch at each end of Pouch.

23a cont.) Continue pinning, easing zipper edges in place thru curves. Again, stop pinning ~1/2" from side single notches then carefully flip zipper ends **under, RSD & INTO** lining area of Pouch.

DO NOTICE— this Mini Pouch doesn't have a zipper pull on each end, so you'll need to carefull line up those zipper teeth on the "non-pull end" with that pencil line then pin those ends in place.

(*Remember, zipper pulls & teeth must align with that pencil line.*) Now you can stitch in place a **FULL 1/4"** from edges around entire perimeter, using a zipperfoot.
